Forensics analysis

To learn more about a PDF file: command pdfinfo on linux

To find out more about image: command exiftool

```
51° 30' 51.90" N, 0° 5' 38.73" W // Hoon we removed all degree words
and replaced it with ° symbol to find it on google maps
```

BurpSuite

When we want to use proxy to intercept traffic, it starts intercepting all requests to all urls. To limit the traffic received. Target --> chose url to add in scope --> go to scope tab to make sure it's added there --> go to proxy--> options(sub-tab) --> choose to enable url "And URL Is in target scope".
